3. [] and I talked about the manpower presentation which I am trying to prepare for the Director and I asked him to give some thought as to how we might present it most effectively.

4. [] have convinced me that we must go forward with our Records Center at [] In this connection I will forward their project to the Project Review Committee. H

5. Agreed to attend a meeting of the ELINT Advisory Committee in [] office at 2:30 p.m. on 30 January. 25X1A

7. Bob Macy telephoned with regard to my query to him concerning an additional \$10,000,000 for our proposed new building. He wanted to know whether we would seek the authorization as well as the appropriation for obligation in Fiscal Year 1958. He seemed to think that we might have a better chance to seek the authorization this year and, in view of the President's policy on construction, defer the appropriation until a later year. I told him that while I thought we would take a whole new look at our entire building situation and would wish to let a contract for the total authorization it would not be impossible to take the approach which he suggested. However, I assured him that we could not predict how this would be received by the Committees of the Congress before which we would have to appear. I will hear further from him on this matter. H
